

## Temperatures monitoring

WINI *Temp* is an innovative solution for temperature monitoring in vineyards.

Wivini is a network between each sensor with the option to connect a electronic pluviometre linked to the main station.

WINI *Temp* sends alert SMS

WINI *Temp* stores a data file to have the record of temperatures and rainfalls.

2_WINITEMPMINI1	GSM THERMOMETER REMOTE CONTROL PANEL
2_WINITEMPZB01	WINITEMP THERMOMETER /HYGROMETER FOR POWER STATION
2_WINIALIMTMINI	POWER CHARGER FOR WINITEMP MINI THERMOMETER
2_WINIBASEGSM	BASE STATION FOR WINICOMP SYSTEM

**The independent station WINITemp is powered by solar panel, it's installed in a isolated place:**

- Receives the information,
- Sends alert messages,
- Sends the information by cycles,
- Connected to a smartphone via Bluetooth
- Receives information of up to 6 thermometers
- The maximum distance of the thermometers varies depending on the relief and the vegetation, it can be between 500 and 800 meters
- The number list for alerts is unlimited.

**24 months warranty**
